SUMMARY

Full Stack Developer with 3+ years of experience building production web applications, backend systems, APIs, and AI-powered platforms. Strong backend focus with experience in FastAPI, Node.js, AdonisJS, Next.js, PostgreSQL, Redis, and AWS S3. Experienced in API architecture, database design, RAG systems, LLM integration, prompt engineering, and AI response validation.

EXPERIENCE

Full Stack Developer
Fortius — Real Estate Training Platform (Freelance Client) | Remote | Sep 2026 – Present

- Designed and delivered an AI-powered learning platform end-to-end for a real-estate client: trainers organize Google Drive materials into learning tracks, realtors work through them with live progress tracking.
- Built the FastAPI backend with PostgreSQL (pgvector), Redis, and Celery, enforcing permission-aware material visibility on every request — browsing, streaming, and AI answers alike.
- Developed a RAG assistant on OpenAI embeddings that answers strictly from each user's visible materials, citing the exact page, slide, or timestamp.
- Implemented a media ingestion pipeline streaming 275+ Drive videos and audio files, with mid-stream failure recovery and automatic requeueing.
- Shipped role-based dashboards in Next.js and React 19; deployed and operate the platform on a Linux VPS with Docker Compose, Caddy, and GitHub Actions CI/CD.

Web Application Developer
Publicity For Good | Remote | Mar 2024 – Jul 2026

- Developed and maintained 20+ backend APIs for authentication, subscriptions, brand management, media assets, and analytics.
- Designed database schemas and delivered full-stack features across AdonisJS, PostgreSQL, Vue.js, and React.
- Implemented AWS S3 asset management and Redis caching/rate limiting for secure, performant applications.
- Built AI-powered workflows using React and FastAPI, including prompt templates, guardrails, response validation, and automated content generation.
- Applied contextual grounding and structured prompting to improve AI response reliability and reduce hallucinations.

Software Developer
Dexio Group | Remote | Sep 2023 – Feb 2024

- Developed a dental appointment platform using React, NestJS, and MongoDB.
- Designed RESTful APIs with validation, modular architecture, and separation of concerns.
- Built reusable, responsive UI components using MUI.

Junior Web Developer
Virtual Staffing Solutions OPC | Ormoc City, Leyte | Feb 2023 – Jul 2023

- Built an Applicant Tracking System using JavaScript and PHP, covering candidate management, job posting, and workflow tracking.
- Digitized internal hiring processes to improve operational efficiency.

EDUCATION

BS in Information Technology
Eastern Visayas State University | Aug 2019 – Jul 2023

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL
Backend: FastAPI, AdonisJS, Node.js, NestJS, Celery, REST APIs
Frontend: React, Next.js, Vue.js, Tailwind CSS, MUI, HTML/CSS
Databases: PostgreSQL, pgvector, Redis, MongoDB, MySQL
Infrastructure: Docker, Docker Compose, Linux, Caddy, AWS S3, GitHub Actions, CI/CD, Git, GitHub, GitLab, Sentry
AI/LLM: RAG Systems with Source Citations, Vector Search, Prompt Engineering, LLM API Integration (OpenAI), AI Guardrails, Response Validation, AI Automation, Agentic Systems
